

Young America Graduates . . .

WITH RECORDS . . . WITH A MESSAGE . . . WITH GROUP LEADERSHIP

Sacramento Junior College SACRAMENTO, CALIFORNIA

Advisory Editor Veda Kuzmanic

# Young America Graduates...

# PIONEER

# Foreword

"Tonight—I graduate . . . "

No matter how hard one tries, he cannot stress enough the importance of Young America, graduate. That his life, his future, his very daily tasks are strands in a pattern of history. Young America, graduate, is an engineering major, a botany student, a geology or pre-legal student, an aero man, a home economics woman. Does it matter, after all, what one calls the graduate?

He will be a part of tomorrow's machine shops, factories, banks, fields, canneries, beauty parlors, homes, airplanes. He has been trained to serve, to do, to give. The graduate, too, has found in his college years companionship and little bits of wisdom in the strangest of places and in the strangest of ways. On the steps of the cafeteria, on the stone bench of the arch, in the back row of Philosophy class, in the dark corridors, on the gym floors. He has discovered real people on the track field, on the sun deck, at crew practice, on the baseball team, while sewing on a costume, while serving at Freshman Tea. He has even skipped class time while getting a few tips on how to fix the car motor, get a date, file for a job, enter a sports competition . . .

"Tonight—I graduate . . . "

Can anyone sit down and put in black and white the graduate's qualifications for life and its knocks? Is his diploma just a record of units or is it a mark of deep satisfaction, somehow sacred?

"And now, there is so much more ahead of me. So much more ahead . . . '

### ON OUR COVER

ON OUR COVER

No other words can express the person of Dr. Richard Edward Rutledge than—nobility of purpose. With little effort he found a spot in the hearts of faculty, downtown businessmen, this graduating class. Or, really, his graduating class—for we were his first and only class at SJC. On March 6 Dr. Rutledge died, after an illness beginning February 12. To him who took so little time-off from numerous tasks, to him whose finest qualities were modesty and self-sacrifice—to him we dedicate this Pioneer. We have become better, more eager for tomorrow because of the flash, the foresight in his eyes. . . . sight in his eyes. . . . The Class of 1942

Board of Education
Mrs. George F. McCormack, President;
Harry B. Seymour, Vice President; Mrs.
P. D. Bevil, Dr. John E. Kennedy, J. E. Lynn

Superintendent's Staff - J. R. Overturf, Superintendent; James F. Bursch, Deputy Superintendent; George C. Jensen and Wil-liam J. Burkhard, Assistant Superintendents

Administration of the College Dr. Nicholas Ricciardi, president; Belle Cooledge and H. E. Tyler, vice presidents

Board of Publications - - Edward I. Cook, Chairman; Herbert Abbott, Claude Petty, Robert Livingston, Carson Sheetz Edward I.

# With Records

Your transcript of record from high school . . . that document introduced you to Registrar Michael J. Brickley, to the administrative offices of Sacramento Junior College. Then, of course, on four occasions you have filed your study program; on many occasions you have appeared at the "Registrar's Window."

On each occasion you saw a group of efficient assistants carrying on the very necessary aspects of a "records" office. Yes, you soon understood that the office was no place for chummy visits; everybody was too busy. You developed respect and consideration for the complicated details facing an efficient record office. . . . And you wanted the office to be businesslike, to do a good job.

Before long, your future occupation may depend quite largely on the punctual attention to your "Will you please send a transcript . . ." letter. You will appreciate the twenty-four hour service such requests receive.

And on the night of Commencement, once again it is the Registrar's Office that stamps the final seal of approval on your permanent record. An Associate in Arts . . . or an A.A. Degree . . . What next? In a few years it may be a Bachelor of Arts, a Doctor of Medicine, a Second Lieutenancy! Civil Service regulations demand transcripts of record with applications for employment—federal, state, municipal. Wise employers build confidence more quickly when suported by good performance in your last job: junior college education.

So from the time of your introduction to Sacramento's expanding campus to the time of your graduation from America's third largest junior college, your records have been kept diligently by the Registrar. Now . . . they speak for themselves.

Past records are past; they must be assiduously and honestly entered. What you do from now on—to improve the record—is up to you!

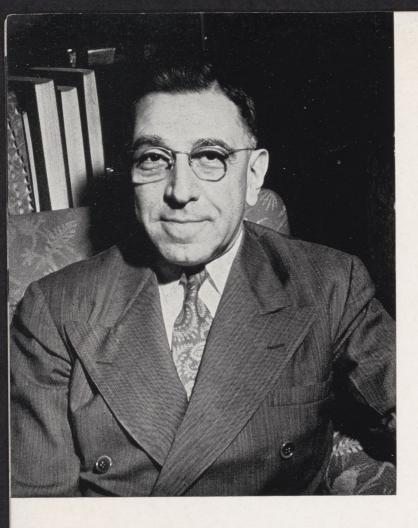

TOP: Michael J. Brickley, registrar. MIDDLE: R. L. Rhodes, assistant registrar; Margaret Miller, senior clerk; Mary Jane McAllister, junior clerk. BOTTOM LEFT: R. L. Rhodes supervises student helpers in the office: Marjorie Shorten, Juanita Redwine, Elma Pierini. BOTTOM RIGHT: Katherine Reed, bookkeeper; and Margaret Cummings, junior clerk.

# A Message

Not many weeks ago, a prospective graduate asked this question: "What is there ahead for me?" At the close of a college year some consideration may be given quite appropriately and profitably to this answer: Civilization must lie ahead.

Civilization has its origin in man's concern about the future. To think about the future is evidence, in itself, that man is civilized; but he must also learn to think straight. Straight thinking should reduce human conflicts to the minimum; it should make clear also the need for distinguishing between human conflict and human collapse. Whether we like it or not, we cannot escape the stern and cold reality that, unless we reduce human conflicts to the minimum, civilization ultimately will collapse.

Civilization means, in a democracy, the improvement of the common lot.

To improve the common lot it is necessary, as one of our industrial leaders has observed, "to behave differently in the future. We must have the common sense to work together with a common understanding of the purposes that we want to accomplish." We must work together, he reiterates; . . . we must behave in such a way as to benefit the public, the workers, the employer, the consumer. There must be no exploitation by one person of another person, by one group of another group, by one nation of another nation. "We have learned a lot; mistakes have been made but there must be an end of indictments, of fault-finding, of accusations, if there is to be industrial peace in the future."

In this leader's thinking lies the answer to: "What is there ahead for me?" It is evident that the future will have much for every one—if we have the good sense to establish industrial peace. We have the resources both material and human. What we need is the common sense to make "the world a home to live in, instead of a place to fight, and freeze, and starve in."

How can we develop the common sense of making "the world a home to live in," a place to produce, to build, and to share in? We can discharge this vital responsibility by educating men and women who will live in accordance with the principles of fellowship, freedom and security. Fellowship does not mean sentimentality or pampering; it means warm and cordial understanding, the influence which makes one feel that he can count on the help of his fellowmen. Fellowship is as vital to human growth as the unfolding of buds into flowers. By freedom is meant the preservation of individuality, the enjoyment of those conditions which enable the individual to be creative, and to have desires respected and encouraged. Security means not only the opportunity to earn a living but also the assurance that one will not be forced to follow a prescribed pattern of behavior; that he will not be exploited for selfish purposes. To live in accordance with these principles calls for human engineering that will help to build a behavior suited to a democratic society.

There has been conspicuous success in physical engineering. There is need of equally conspicuous success in human engineering. Immediately some will say: "It can't be done." But great scientists like Arthur Compton, Jean Perrin and Robert Millikan, all Nobel Prize winners, say it can be done. The formula is simple. It is this: Get the truth intellectually, interpret it scientifically, and apply it religiously in every-day living. That is the way to change human behavior; and human behavior can be changed, even if we concede that human nature cannot be changed.

Not many years ago the motor car behaved rather unsatisfactorily because it developed knocks after it had been used a comparatively short time. The leaders in the automotive industry decided to find out what caused the knocks. The first thing they did was to construct at a cost of about \$200,000 equipment which would enable the research workers to investigate most effectively. After eight years of scientific research and an expenditure of nearly eight millions of dollars a fuel was developed which practically eliminated all of the knocking in motors.

We have been spending, and are still spending, millions of dollars on research intended to discover ways of improving the behavior of things. Are we ready now to spend millions of dollars on research intended to find ways of improving human behavior so that we may "knock the knocking" out of human beings?

Graduates of the Junior College, college-bred men and women, must help to make the answer to that question emphatically affirmative. If the answer is a positive "Yes," then much may be expected of the future. The Graduates of the Class of 1942 may be sure that there is a promising future ahead for them.

Who are your Board of Education members? Seated at a recent session were, left to right, Dr. J. E. Kennedy, J. E. Lynn, Mrs. G. F. McCormack, president, J. R. Overturf, superintendent, and Harry B. Seymour. In front of the table is Dr. James F. Bursch, deputy superintendent. Mrs. P. D. Bevil, board president a few years back, was absent when the picture was taken. She has scarcely missed a meeting of the group. Illness of relatives kept Mrs. Bevil away from Sacramento for past few weeks.

Top: President Ricciardi confers with Assistant Superintendent George C. Jensen, in charge of secondary education. Mr. Jensen was principal of Sacramento High School for several years.

Bottom: Charles C. Hughes, who served twenty-nine years as Sacramento City School Superintendent, was dean of superintendents in the West at the time of his retirement last January.

Taking office in January, 1942, Superintendent Jesse R. Overturf already has set ambitious goals for Sacramento's expanding school system. Total War requires training in mechanized skills for industry, specialization for armed services, home defense for civilians... Public schools must be on the alert, constantly; under Overturf's leadership, Sacramento's schools assume an active, important part in America's war effort.

# Group Leadership

Sacramento Junior College exists for the common good of the area it serves, for the establishment of clearly defined, worthy objectives in young men and women who will largely shape the post-war future of the world. This is a guiding principle or philosophy of Sacramento's educational ideals, its very existence.

The responsibility of the administration is to help individuals go through certain experiences so that they will behave in certain socially constructive ways. To that end, for that purpose of assisting American youth to attain self-reliance and individual integrity, the College must constantly progress.

### The Board of Education

Legal trusteeship of the College rests in the Board of Education. America's public school system has been built around the faithful service of Boards of Education, or Boards of Trustees, whose members serve without compensation. The community, the parents with children in the public schools, the schools themselves—all are recipients of the talents and abilities of these unselfish citizens.

Democracy still exists in America because unselfish citizens still serve the common cause, because they accept the serious responsibilities of institutions like the public schools. . . . A college directed by far-sighted, alert Boards of Education represents one of America's most worthy contributions to world civilization.

Creative leadership in Sacramento founded Sacramento Junior College twenty-six years ago, when public junior colleges were purely educational experiments. Time has proved the wisdom of Sacramento's leaders. Today the College is among the ten leaders of the nation; today the College seeks extension of its services in the greater Sacramento Region.

ADMINISTRATIVE COUNCIL, clockwise from President Nicholas Ricciardi: Vice President Harry E. Tyler, Dean of the Adult Division John E. Carpenter, Business Manager Fred L. Spring, Dean of Extracurricular Activities Ed I. Cook, Dean of Men Harvey M. Skidmore, Registrar Michael J. Brickley, Vice President Belle Cooledge.

PERSONNEL COMMITTEE (opposite page):
1, Chairman H. E. Tyler; 2, Jeanette F. Minard; 3, Mary T. Stafford; 4, Alvina M. Wellensick; 5, H. T. Tyler; 6, Vernon Mickelson; 7, Belle Cooledge; 8, President Ricciardi; 9, Whittier Wallace; 10, Ed I. Cook; 11, H. M. Skidmore; 12, M. J. Brickley; 13, D. P. Seldon.

OPEN HOUSE COMMITTEE: (opposite page): 1, Chairman E. I. Cook; 2, Claude Petty; 3, Carson Sheetz; 4, Raymond Rhodes; 5, John G. Webb; 6, Vernon Mickelson; 7, Whittier Wallace; 8, Joseph Dowdell; 9, Hilton F. Lusk; 10, Ralph Weston; 11, George Teale; 12, A. T. Hay, Jr.; 13, William Burdick; 14, Robert Livingston; 15, Jeanette Minard; 16, George Kimber; 17, Saidee Stark; 18, Mason Johnston; 19, Kenneth Carter; 20, Henry Tyler; 21, Glenn Davies; 22, Richard Reeve; 23, Kermit Parker; 24, Marvin Cragun.

### The Administrative Council

Under the new presidency of Dr. Nicholas Ricciardi, an Administrative Council determines policies of the College, evolved with the help of the faculty. Its policies are not final, not static . . . they are designed to the end that the faculty may serve most effectively all students.

Foundations for successful administration are based, through group thinking, upon the pronounced feeling that the faculty and the administrators must understand each other. Suggestions for improving Sacramento's regional service form major considerations of Council meetings.

The Administrative Council includes the president, the two vice presidents, the four deans and the comptroller. From this board the department chairmen, the coordinators, and all special committees accept their delegation of authority and responsibility.

Groups plan . . . groups execute. Group thinking is the democratic process in action.

## The Faculty in Action

From twenty-seven departments, from twelve special committees, from six counselors, from coordinators and the faculty at large come the working blueprints of "education in action."

A few of these divisions of the College are represented here by photographs . . . but all of the specialized skills of 175 faculty members, clerks, custodians, gardeners, engineers, infuse this book with the life of a modern, well-equipped college. There would be no college without them.

ART SCHOLARSHIP COMMITTEE meeting in the home of the chairman, Harold Ward. Next to Ward, left to right, are Walter Murray, John Matthew, Wilson Craven (legal counsel), Marjorie I. Graham, Mary R. Cravens.

While every "committee" is important—otherwise it would not exist—only a few committees greet you from these pages. Perhaps the largest group to serve during 1941-42 is the Open House Committee that arranged for participation in Public Schools Week, April 30... The importance of counsel and guidance comes under the functions of the Personnel Committee; the Catalogue Committee edits and amends the official list of courses taught at the College; the Art Scholarship Committee awards prizes and other philanthropies from the Art Ball Fund; the Music Committee directs an important cultural aspect of student life. . . . Each group serves similarly to "committee government" of our city, state and nation.

Even faculty members as individuals serve best in consultation. Problems of the classroom, of the individual student, resolve themselves smoothly through smaller groups like those on these pages.

### Faculty and Students

The May 29 general election adopted a new student body constitution by an overwhelming vote. Provisions of this document offer an opportunity for students and faculty to work more cooperatively, more closely together . . . in the group responsibilities, the group advantages of an alert college.

Groups with active members, groups with alert leaders sum up the basic training of America's young men and women—through faculty and student government—in the greatest public school system the world has yet known. . . . Again, the working model of Democratic processes reflects itself in active groups.

CATALOGUE COMMITTEE: John H. Swan, Howard C. Day, Stacy H. Smith, Margaret Harrison, Whittier W. Wallace, President Ricclardi, Registrar Michael J. Brickley, and brunette head of Secretary Margaret Miller.

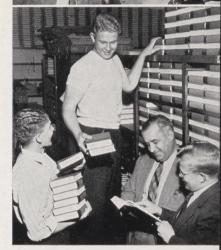

LEFT, below: In the Fine Arts Building members of the faculty music committee: Holland Frazee, Stewart W. Tulley, David L. Burnam, Ruel J. Taylor, and Ivine Shields.

RIGHT, below: Librarians Marie Erwin, Marvin W. Cragun, and Donna Harris talk over books, their general public, and methods of reminding loaners that their books are due.

TOP: H. C. Day, Mary Cravens and C. C. Wright. MIDDLE: Frances Frater and J. L. Seymour. BOTTOM: In the book store, Torvald Bertinuson and Harry Peterson, student workers; with Comptroller F. J. Spring and Manager John Hovde.
